Finance and
Management
gGmbH**

Dear Recruiting Team:

I am writing to express my keen interest in the Frankfurt School of Finance and Management GmbH computer science position. With a bachelor's in computer science and currently pursuing a Master's in Artificial Intelligence and Machine Learning, I have gained valuable practical experience that I believe aligns well with the demands of the job.

During my tenure as a Machine Learning Engineer at Careem, I automated data summarization processes, significantly reducing loading times by 50%, and implemented large language models for language localization, leading to a notable increase in translation accuracy. At Royal Cyber Inc., as a Data Science Intern, I researched and implemented solutions for data governance on various cloud platforms, doubling security measures. Additionally, my role as a Software Engineer Intern at Bitnine Global Inc. involved contributing to the development of Apache Age, where I implemented key functionalities.

These experiences instilled in me a deep understanding of the importance of innovation and collaboration in driving impactful solutions. I am particularly drawn to company's reputation for excellence and its commitment to pushing the boundaries of innovation in the data industry. I am excited about the prospect of contributing to the data sector which will help me in leveraging my skills to drive meaningful outcomes for the organization.

I would welcome the opportunity to further discuss this position with you. If you have questions or would like to schedule an interview, please contact me by phone at (+49) 1638713986 or by email at waleedshahid524@gmail.com.

Sincerely,
Waleed Ahmed Shahid
